

## Carvacrol 85% — Origanum vulgare (oregano)

*Origanum vulgare* · Lamiaceae

Prepared in accordance with Regulation (EC) No 1907/2006 (REACH) Annex II as amended by Commission Regulation (EU) 2020/878, and the UN GHS. The 16-section format also meets US OSHA HCS 29 CFR 1910.1200 Appendix D and Canada WHMIS 2015 (Hazardous Products Regulations, SOR/2015-17).

### Section 1. Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

|                  |                                              |
|------------------|----------------------------------------------|
| Product name     | Carvacrol 85% — Origanum vulgare (oregano)   |
| INCI name(s)     | Origanum Vulgare Extract                     |
| Botanical source | <i>Origanum vulgare</i>                      |
| Product code     | WH-C85-0V                                    |
| Type of product  | Substance (natural complex substance / UVCB) |

#### 1.2 Relevant identified uses and uses advised against

|                      |                                                                                                                                                                                        |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Identified uses      | Raw material for professional / industrial formulation of cosmetics & personal care, food & beverage, nutraceuticals (functional food, herbal tea & infusions, skincare, supplements). |
| Uses advised against | Uses other than those identified. Not for direct medicinal use. Not for use by the general public without further formulation and labelling.                                           |

#### 1.3 Details of the supplier of the safety data sheet

|                           |                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------|
| Supplier                  | <b>CHOLAD PRIVATE LIMITED</b><br>C 22/4, 2nd & 3rd Floor, Sector-57<br>Noida 201301, Uttar Pradesh, India |
| Telephone                 | +91 817 8117 600                                                                                          |
| E-mail (competent person) | choladco@gmail.com                                                                                        |
| Website                   | <a href="https://thewholesaler.eu">https://thewholesaler.eu</a>                                           |

#### 1.4 Emergency telephone number

+91 817 8117 600 (24 h). In the EU you may also contact your national poison centre (Europe-wide emergency number 112).

### Section 2. Hazards identification

#### 2.1 Classification of the substance or mixture (Regulation (EC) No 1272/2008 (CLP) / UN GHS)

- Acute toxicity (oral), Category 4 — H302
- Skin corrosion, Category 1B — H314

#### 2.2 Label elements

**Signal word: Danger**

**Hazard statements**

- H302 Harmful if swallowed.
- H314 Causes severe skin burns and eye damage.

**Precautionary statements**

- P261 Avoid breathing dust.
- P264 Wash hands thoroughly after handling.
- P280 Wear protective gloves/eye protection.
- P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.
- P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- P310 Immediately call a POISON CENTER/doctor.
- P501 Dispose of contents/container in accordance with local regulations.

**2.3 Other hazards**

May form combustible dust concentrations in air (US OSHA: hazard not otherwise classified, HNOC). Does not contain substances assessed as PBT/vPvB or as endocrine disruptors at  $\geq 0.1$  %.

**Section 3. Composition / information on ingredients**

3.1 Substance

| COMPONENT (INCI)                                 | CAS        | EC        | CONCENTRATION | CLASSIFICATION |
|--------------------------------------------------|------------|-----------|---------------|----------------|
| Origanum Vulgare Extract<br>Botanical ingredient | 84012-24-8 | 281-670-3 | 100 %         | H302, H314     |

Natural botanical material of variable composition. No other ingredients that are classified as hazardous and contribute to the classification are present at or above reportable thresholds, to the best of our knowledge.

**Section 4. First-aid measures**

|                             |                                                                                                                                                             |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation                  | Move to fresh air. If irritation of the airways or breathing difficulty persists, get medical advice.                                                       |
| Skin contact                | Take off immediately all contaminated clothing. Rinse skin with water for at least 15 minutes. Get immediate medical attention.                             |
| Eye contact                 | Rinse immediately with plenty of water for at least 15 minutes, holding eyelids open; remove contact lenses if easy to do. Get immediate medical attention. |
| Ingestion                   | Rinse mouth. Call a poison centre or doctor if you feel unwell.                                                                                             |
| Most important symptoms     | See Section 2: Harmful if swallowed.; Causes severe skin burns and eye damage.                                                                              |
| Immediate medical attention | Get medical advice if swallowed or if symptoms persist.                                                                                                     |

**Section 5. Fire-fighting measures**

|                  |                                                                                            |
|------------------|--------------------------------------------------------------------------------------------|
| Suitable media   | Water spray, foam, dry chemical, carbon dioxide. Use a gentle spray to avoid raising dust. |
| Unsuitable media | Direct high-pressure water jet (may disperse dust).                                        |

|                                |                                                                                                                                                                                          |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Specific hazards</b>        | Combustible solid. Fine dust dispersed in air in sufficient concentration may form an explosive mixture with an ignition source. Combustion produces carbon monoxide and carbon dioxide. |
| <b>Advice for firefighters</b> | Wear self-contained breathing apparatus and full protective clothing.                                                                                                                    |

## Section 6. Accidental release measures

|                                    |                                                                                                                                                       |
|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Personal precautions</b>        | Avoid creating and breathing dust. Wear suitable protective equipment (see Section 8).                                                                |
| <b>Environmental precautions</b>   | Prevent large quantities entering drains or surface water.                                                                                            |
| <b>Clean-up</b>                    | Sweep or vacuum up (preferably with an explosion-protected vacuum) and place in a closed container for disposal. Avoid dry sweeping that raises dust. |
| <b>Reference to other sections</b> | See Sections 8 and 13.                                                                                                                                |

## Section 7. Handling and storage

|                                      |                                                                                                                                                                                                               |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Precautions for safe handling</b> | Avoid dust formation and dust accumulation on surfaces. Keep away from ignition sources; ground equipment when transferring large quantities. Observe good hygiene; do not eat, drink or smoke in work areas. |
| <b>Conditions for safe storage</b>   | Store in tightly closed original containers in a cool (below 25 °C), dry, well-ventilated place, away from direct sunlight, moisture, strong odours and incompatible materials.                               |
| <b>Specific end uses</b>             | See Section 1.2.                                                                                                                                                                                              |

## Section 8. Exposure controls / personal protection

### 8.1 Control parameters

|                                 |                                                                                                                                                                                                                                    |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Inhalable dust (general)</b> | Observe national occupational limits for nuisance/inert dust, e.g. ACGIH TLV (PNOS) 10 mg/m <sup>3</sup> inhalable, 3 mg/m <sup>3</sup> respirable; US OSHA PEL (PNOR) 15 mg/m <sup>3</sup> total, 5 mg/m <sup>3</sup> respirable. |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

DNEL / PNEC: no data available.

### 8.2 Exposure controls

|                               |                                                                                    |
|-------------------------------|------------------------------------------------------------------------------------|
| <b>Engineering controls</b>   | Use local exhaust ventilation where dust is generated.                             |
| <b>Eyes protection</b>        | Safety glasses with side shields (EN 166 / ANSI Z87.1) where dust is generated.    |
| <b>Skin protection</b>        | Protective gloves (e.g. nitrile) for prolonged contact; work clothing.             |
| <b>Respiratory protection</b> | Where dust is generated, a particle filter mask (EN 149 FFP2 / NIOSH N95).         |
| <b>Hygiene measures</b>       | Wash hands before breaks and after work. Do not eat, drink or smoke when handling. |
| <b>Environmental exposure</b> | Avoid release of large quantities to drains and the environment.                   |

## Section 9. Physical and chemical properties

|                                        |                                            |
|----------------------------------------|--------------------------------------------|
| Physical state                         | Liquid                                     |
| Colour                                 | Characteristic                             |
| Odour                                  | Characteristic                             |
| Melting point / freezing point         | Not determined                             |
| Boiling point or initial boiling point | Not determined                             |
| Flammability                           | See flash point                            |
| Lower and upper explosion limits       | Not determined                             |
| Flash point                            | Not applicable (solid)                     |
| Auto-ignition temperature              | Not determined                             |
| Decomposition temperature              | Not determined                             |
| pH                                     | Not determined                             |
| Kinematic viscosity                    | Not determined                             |
| Solubility                             | Not determined                             |
| Partition coefficient n-octanol/water  | Not applicable (natural complex substance) |
| Vapour pressure                        | Not determined                             |
| Density and/or relative density        | Not determined — see COA                   |
| Particle characteristics               | 80–100 mesh                                |

## Section 10. Stability and reactivity

|                        |                                                                      |
|------------------------|----------------------------------------------------------------------|
| Reactivity             | Not reactive under normal conditions.                                |
| Chemical stability     | Stable under recommended storage conditions.                         |
| Hazardous reactions    | Dust explosion possible if dispersed in air near an ignition source. |
| Conditions to avoid    | Heat, moisture, open flames, sparks, dust clouds.                    |
| Incompatible materials | Strong oxidising agents.                                             |
| Decomposition products | Carbon monoxide and carbon dioxide on combustion.                    |

## Section 11. Toxicological information

No toxicological data are available for this specific product. Classification is based on the hazards of the marker compound (carvacrol) at the standardised concentration.

|                                   |                                                                   |
|-----------------------------------|-------------------------------------------------------------------|
| Acute toxicity                    | Acute toxicity (oral), Category 4 — H302                          |
| Skin corrosion / irritation       | Based on available data, the classification criteria are not met. |
| Serious eye damage / irritation   | Based on available data, the classification criteria are not met. |
| Respiratory or skin sensitisation | Based on available data, the classification criteria are not met. |
| Germ cell mutagenicity            | Based on available data, the classification criteria are not met. |

|                                        |                                                                   |
|----------------------------------------|-------------------------------------------------------------------|
| <b>Carcinogenicity</b>                 | Based on available data, the classification criteria are not met. |
| <b>Reproductive toxicity</b>           | Based on available data, the classification criteria are not met. |
| <b>STOT — single exposure</b>          | Based on available data, the classification criteria are not met. |
| <b>STOT — repeated exposure</b>        | Based on available data, the classification criteria are not met. |
| <b>Aspiration hazard</b>               | Based on available data, the classification criteria are not met. |
| <b>Endocrine-disrupting properties</b> | Not known to contain endocrine disruptors at $\geq 0.1$ %.        |

Carcinogenicity listings: no component is listed by IARC, NTP or OSHA as a carcinogen, to the best of our knowledge.

## Section 12. Ecological information

No ecotoxicity data are available. Natural material; expected to be readily biodegradable. Not considered PBT or vPvB. Not expected to be harmful to aquatic life at normal handling quantities.

|                                        |                                     |
|----------------------------------------|-------------------------------------|
| <b>Toxicity</b>                        | No data available for this product. |
| <b>Persistence and degradability</b>   | Expected to be biodegradable.       |
| <b>Bioaccumulative potential</b>       | Not expected to bioaccumulate.      |
| <b>Mobility in soil</b>                | No data available.                  |
| <b>PBT / vPvB assessment</b>           | Not considered PBT or vPvB.         |
| <b>Endocrine-disrupting properties</b> | None known.                         |

## Section 13. Disposal considerations

Dispose of in accordance with local, regional and national regulations. Uncontaminated material may be composted or disposed of as non-hazardous waste. Empty packaging may be recycled.

## Section 14. Transport information

UN 3265 CORROSIVE LIQUID, ACIDIC, ORGANIC, N.O.S. (carvacrol), Class 8, PG III — confirm per batch.

|                                                 |                      |
|-------------------------------------------------|----------------------|
| <b>UN number / ID</b>                           | See above            |
| <b>Proper shipping name</b>                     | See above            |

| <b>Environmental hazards / marine pollutant</b> | Possible — see above |
| <b>Transport in bulk (IMO instruments)</b>      | Not applicable       |

## Section 15. Regulatory information

### European Union

|                                    |                                                                                                                                                                                            |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>REACH (EC) No 1907/2006</b>     | Natural botanical substance (UVCB). Registration obligations depend on the importer and annual tonnage. Not listed on the REACH Candidate List (SVHC) or Annex XIV/XVII, to our knowledge. |
| <b>Cosmetics (EC) No 1223/2009</b> | INCI name(s) listed in the EU CosIng database (ref. 86662). Not listed in Annexes II or III, to our knowledge.                                                                             |

|                            |                                                                                                                                                                |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical safety assessment | Not carried out.                                                                                                                                               |
| <b>United States</b>       |                                                                                                                                                                |
| OSHA HCS                   | Hazardous — see Section 2.                                                                                                                                     |
| TSCA                       | Substances used solely in food, drugs or cosmetics are regulated by the FDA and excluded from TSCA. For other uses, contact the supplier for inventory status. |
| SARA Title III / CERCLA    | No components listed under SARA 302/313 or CERCLA, to our knowledge.                                                                                           |
| California Proposition 65  | Contact the supplier for a batch-specific statement.                                                                                                           |
| <b>Canada</b>              |                                                                                                                                                                |
| WHMIS 2015 (HPR)           | Hazardous product — see Section 2.                                                                                                                             |
| DSL / NDSL                 | Contact the supplier for inventory status.                                                                                                                     |

Where this product is imported into the EU/EEA by the customer, the importer is responsible for any REACH registration and for providing this SDS in the official language(s) of the Member State where it is placed on the market.

## Section 16. Other information

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Date of issue / revision | 26 October 2026 — version 1.0, first issue                                                                                                                                                                                                                                                                                                                                                                                  |
| Basis of classification  | Classification based on the marker compound (carvacrol) at the standardised concentration shown in the product name, using its published GHS/CLP classification.                                                                                                                                                                                                                                                            |
| Related documents        | Technical Data Sheet TDS-WH-C85-OV. Certificate of Analysis on request.                                                                                                                                                                                                                                                                                                                                                     |
| Abbreviations            | CAS: Chemical Abstracts Service; CLP: Classification, Labelling and Packaging; EC: European Community number; GHS: Globally Harmonized System; HNOC: hazard not otherwise classified; INCI: International Nomenclature of Cosmetic Ingredients; OEL: occupational exposure limit; PBT: persistent, bioaccumulative, toxic; UVCB: substance of unknown or variable composition; vPvB: very persistent, very bioaccumulative. |
