EU CosIng reference no.: 83072, 75444, 58617, 77800, 78835, 34238 · INCI status: Verified in CosIng  
Where more than one CAS number is shown, the botanical substance is registered under several CAS numbers (e.g. EINECS and TSCA variants); all refer to the same INCI name.

## 3. Manufacturing

|         |                         |
|---------|-------------------------|
| Process | Infusion in carrier oil |
|---------|-------------------------|

|                  |                                                                          |
|------------------|--------------------------------------------------------------------------|
| <b>Additives</b> | No added colours, fragrance or preservatives unless stated on the label. |
|------------------|--------------------------------------------------------------------------|

#### 4. Typical properties

|                            |                                                                           |
|----------------------------|---------------------------------------------------------------------------|
| <b>Physical state</b>      | Liquid                                                                    |
| <b>Appearance / colour</b> | Characteristic of the plant material; may vary naturally between harvests |
| <b>Odour</b>               | Characteristic                                                            |
| <b>Solubility</b>          | Oil-soluble                                                               |
| <b>Flash point</b>         | Typically > 200 °C (vegetable oils; not determined for this batch)        |

Typical values describe the product type and are not a specification. Batch-specific results (assay, moisture, microbiology, heavy metals as applicable) are given on the Certificate of Analysis, available on request.

#### 5. Applications and use

|                            |                                                                                                                              |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>Applications</b>        | Herbal tea & infusions, Skincare                                                                                             |
| <b>Markets</b>             | Cosmetics & personal care, Food & beverage                                                                                   |
| <b>Suggested use level</b> | Typical use level in cosmetics 1–10 % (oil-soluble and infused oils up to 100 % of the oil phase); carrier oils up to 100 %. |

The formulator is responsible for confirming suitability, stability and regulatory compliance of the finished product in the intended market. Not intended for direct medicinal use.

#### 6. Packaging, storage and shelf life

|                   |                                                                                                                                                                                                      |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Pack sizes</b> | 225 g, 1 Kg, 5 Kg — bulk and custom quantities on request                                                                                                                                            |
| <b>Storage</b>    | Store in tightly closed, well-filled original containers in a cool (below 25 °C), dry, dark place away from heat, oxidising agents and direct sunlight. Butters and waxes may soften above 25–35 °C. |
| <b>Shelf life</b> | 18–24 months from the date of manufacture in unopened original packaging stored as recommended. Infused and oil-soluble extracts: 12–18 months.                                                      |

#### 7. Documentation and quality

|                                |                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------|
| <b>Safety Data Sheet</b>       | SDS-99170-INF-BAARU — available for download on the product page                |
| <b>Certificate of Analysis</b> | Batch-specific COA available on request                                         |
| <b>Other documents</b>         | Allergen, IFRA, origin and other statements on request, subject to availability |
