

# Pine Hydrosol - Pinus sylvestris

*Pinus sylvestris* · Pinaceae

Hydrosol Water-soluble Cosmetic grade

## 1. Product identification

|                         |                                                                                                                                                         |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product name            | Pine Hydrosol - Pinus sylvestris                                                                                                                        |
| Botanical name          | <i>Pinus sylvestris</i> (syn. <i>Pinus cretacea</i> , <i>Pinus erzeroomica</i> , <i>Pinus rigensis</i> , <i>Pinus scotica</i> , <i>Pinus tatarica</i> ) |
| Plant family            | Pinaceae                                                                                                                                                |
| Common names            | Pine, Native Scots Pinewood, Scotch Pine, Scots Pine, Scots Pine, Scotch Pine, Baltic Pine                                                              |
| Product form            | Hydrosol                                                                                                                                                |
| Product code (SKU base) | 81900-HYD-PINSY                                                                                                                                         |

## 2. Composition and identifiers

INCI: Pinus Sylvestris Water

| INCI / COMPONENT       | FUNCTION             | CAS | EC | PROPORTION |
|------------------------|----------------------|-----|----|------------|
| Pinus Sylvestris Water | Botanical ingredient | —   | —  | 100 %      |

INCI status: INCI by naming convention (not in CosIng)

Where more than one CAS number is shown, the botanical substance is registered under several CAS numbers (e.g. EINECS and TSCA variants); all refer to the same INCI name.

## 3. Manufacturing

|           |                                                                          |
|-----------|--------------------------------------------------------------------------|
| Process   | Steam distillation                                                       |
| Additives | No added colours, fragrance or preservatives unless stated on the label. |

## 4. Typical properties

|                     |                                                                           |
|---------------------|---------------------------------------------------------------------------|
| Physical state      | Liquid (aqueous)                                                          |
| Appearance / colour | Characteristic of the plant material; may vary naturally between harvests |
| Odour               | Characteristic                                                            |
| Solubility          | Water-soluble                                                             |
| Flash point         | Not applicable (aqueous, not flammable)                                   |

Typical values describe the product type and are not a specification. Batch-specific results (assay, moisture, microbiology, heavy metals as applicable) are given on the Certificate of Analysis, available on request.

## 5. Applications and use

|                     |                                                                                     |
|---------------------|-------------------------------------------------------------------------------------|
| Applications        | Hair care, Perfumery, Skincare                                                      |
| Markets             | Cosmetics & personal care                                                           |
| Suggested use level | Typical use level up to 100 % of the water phase in toners, mists, creams and gels. |

The formulator is responsible for confirming suitability, stability and regulatory compliance of the finished product in the intended market. Not intended for direct medicinal use.

## 6. Packaging, storage and shelf life

|            |                                                                                                                                                         |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Pack sizes | 225 g, 1 Kg, 5 Kg — bulk and custom quantities on request                                                                                               |
| Storage    | Store in tightly closed containers in a cool (ideally 4–15 °C), dark place. Avoid freezing and microbial contamination; use within 6 months of opening. |
| Shelf life | 12 months from the date of manufacture in unopened original packaging stored as recommended.                                                            |

## 7. Documentation and quality

|                         |                                                                                 |
|-------------------------|---------------------------------------------------------------------------------|
| Safety Data Sheet       | SDS-81900-HYD-PINSY — available for download on the product page                |
| Certificate of Analysis | Batch-specific COA available on request                                         |
| Other documents         | Allergen, IFRA, origin and other statements on request, subject to availability |
